

The journey has begun

We are building a carbon marketplace built on transparency and integrity, setting a new standard for the carbon market industry. As a result, climate action and responsibility become a part of our everyday lives and we can enable the larger systemic change required to combat climate change.

Callirius is committed to bringing together individuals from different backgrounds and perspectives. We believe that life is a learning journey and each person brings unique expertise to our team and gets to grow in one's role.

If you're a kind, passionate, collaborative problem-solver and are looking for a new opportunity to make a difference, join us!

Welcome our new Sourcing Specialist

Our Project Sourcing team works hand in hand with project owners and developers, active in the carbon markets to identify, negotiate and contract new emission reduction projects. By acquiring new projects within our portfolio, we ensure that Callirius always has the right mix of carbon credits available to meet the demands of our clients. If you're an entrepreneurial, ambitious and dynamic sustainability professional with a strong passion to make a real difference in the fight against climate change, this position may be right for you!

Job summary:

The Sourcing Specialist will primarily focus on emission reduction project leads, opportunities and potentially other areas in Europe. You will be responsible for initial project assessment, potential leads follow-up, and terms negotiation in this role. Additionally, you will ensure smooth and eloquent operationalization of global project sourcing flows, processes, document handling, database management, and coordination with different teams on various tasks and activities. This exciting opportunity entails a combination of administration, business development, project analysis, and stakeholder/client engagement.

Main tasks & responsibilities:

Support project sourcing operations activities for emission reduction projects Ensure that sourcing flows and processes (including documentation, and interaction with other teams) are in line with the company guidelines Ensuring that information regarding project leads and opportunities are well recorded and updated Support coordination and collaboration with team members in regards to project leads and opportunities.

Conduct research relevant to new project leads, project developers, project owners, relevant regulatory regimes/policies related to nature based carbon projects.

Create and negotiate commercial terms with project owners.

Collect data from Project Owners or other third party for due diligence, technical, financial and legal documentation. Where relevant attend meetings/seminars/workshops/events that are strategic for sourcing team activities.

Study key methodologies/project documents and perform initial project assessments

Support project implementation work (e.g. data collection for PDD/MR writing) when needed.

Requirements:

A Bachelor degree or higher, ideally in Environmental Sciences, Engineering, Energy, Forestry, Law, Economics or sustainability-related disciplines.

At least 1 years of relevant work experience for Bachelor degree holders. At least internship experience for Master degree holders.

Good oral and written command of English is a must.

Experience and interest Client Management and networking – people skills.

Demonstrated interest or skills with commercial transactions and business acumen.

Comfortable working with an international and multicultural teams.

Desirable:

Experience in project identification and screening for potential leads.

Knowledge of carbon products and markets, preferably including one or more of the following: CDM, GS, VCS etc.
